AROOSHA SHAFQAT

Frontend / Full-Stack Developer | React.js • JavaScript (ES6+) • TypeScript • Node.js • REST API Integration

+92-311-7699067 | arooshashafqat24@gmail.com | Islamabad, Pakistan | github.com/Arosha733 | linkedin.com/in/aroosha-shafqat

PROFILE

Frontend / Full-Stack developer graduating with a BSc in Information Technology, specializing in building responsive, mobile-first interfaces with React.js, JavaScript (ES6+), and TypeScript, and connecting them to Node.js and Python backends via RESTful APIs. Has shipped several self-directed full-stack projects end-to-end — including an AI/IoT-integrated mobile application — covering everything from UI development to backend logic, API design, and database interaction. Comfortable with Git/GitHub workflows and Agile practices, with hands-on SQL experience and a working knowledge of cloud platforms (AWS, Azure). Currently expanding into MongoDB and Express.js to round out the MERN stack. Seeking a Junior Frontend / Full-Stack Developer role to grow within a production engineering team.

PROFESSIONAL EXPERIENCE

Web Development Intern
Aug 2026 – Present

Hex Softwares Pvt. Ltd. — Remote (WFH)

- Selected for a one-month remote Web Development internship, applying frontend skills in React.js and JavaScript to live client-facing web projects.
- Set to contribute to hands-on development tasks including UI implementation, responsive design, and REST API integration as part of a distributed team.
- Engaging with the team's Agile workflow, including sprint planning and Git/GitHub-based code collaboration.

Frontend Development Intern
Aug 2026 – Present

Zynvex Solutions — Remote

- Developed and maintained responsive UI components using React.js, JavaScript (ES6+), and CSS3, collaborating with the team on client-facing web applications.
- Integrated RESTful APIs into frontend interfaces and assisted with debugging and cross-browser compatibility testing.
- Participated in Agile/Scrum workflows, including sprint planning and code reviews via Git/GitHub.

IT Intern — Networking & Database Support
Jul 2025 – Aug 2025

Kamra, Pakistan

- Resolved 10+ technical support tickets per week (Tier-1/Tier-2 hardware, software, and network issues), sharpening debugging and troubleshooting skills directly transferable to full-stack development.
- Configured and maintained enterprise LAN/WAN infrastructure using Cisco routers and switches, supporting 99%+ uptime.
- Assisted with Oracle database administration — data monitoring, backup verification, and query optimization — building foundational backend/database skills.

CORE SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Responsive & Mobile-First Design, Cross-Browser Compatibility, DOM Manipulation, SPA Architecture

Backend & APIs: Node.js, Express.js (in progress), RESTful API Design & Integration, Python, Server-Side Logic

Databases: SQL, Oracle DB Administration, Query Optimization, MongoDB (currently learning)

Tools & Workflow: Git, GitHub, Agile/Scrum, SDLC, AWS, Microsoft Azure

Additional: AI/ML Integration, NLP, IoT Integration, Cisco Networking (LAN/WAN), Cybersecurity Fundamentals

PROJECTS

AI-Powered Mobile App for Energy Optimization
2025 – 2026

Final Year Project

- Built the full-stack architecture end-to-end: a React.js frontend consuming REST APIs, a Python-based ML backend, and live IoT sensor integration for real-time energy optimization.

- Designed a mobile-first, responsive UI to visualize real-time sensor data streams and optimization recommendations.

E-Commerce UI 2024

Personal Project — React.js, Bootstrap

- Built a full e-commerce interface with product listings, cart state management, and mobile-first responsive layout.

API-Integrated Frontend Apps 2024

Personal Projects — Weather Forecast App, Currency Converter, Amazon Clone, YouTube Clone

- Built four independent React applications, each consuming a different third-party REST API, focused on DOM manipulation, state management, and cross-browser compatible UI.

Home Automation Dashboard 2024

Personal Project — REST API, IoT

- Built a web-based control interface for real-time IoT device state management, backed by REST API calls.

Sentiment Analysis Tool & AI Agent 2024

Personal Projects — Python, NLP

- Built a Python/NLP text classification system with a visualized sentiment-trend dashboard, and a separate autonomous NLP-powered agent integrated into a mobile app workflow.

EDUCATION

BSc Information Technology Sep 2022 – Jun 2026

Air University, Islamabad | CGPA: 3.05/4.0

LEADERSHIP & EXTRACURRICULAR

Media Director 2024 – 2026

Air University IT Society, Islamabad

- Led media strategy and content production for the flagship IT society; managed visual communications and event coverage, increasing engagement across events.

Media Team Member 2023 – 2024

Air University, Islamabad

General Member — Microsoft Student Community 2022 – 2023

Air University, Islamabad

CERTIFICATIONS

- Cisco Packet Tracer Certificate — Network Simulation, Topology Design & Troubleshooting
- Cybersecurity Conference Certificate — Current Threat Landscapes & Security Frameworks
