Anzish Suleman

Graphic Designer

Professional Summary

Creative UI/UX and Graphic Designer who turns user research into clean, simple layouts. Skilled across the whole project lifecycle, from designing standout posters and print layouts to building easy-to-use apps and website prototypes.

Projects & Experience

NS Training - (2024)

- Designed professional marketing collateral, including **social media assets, posters, brochures, and business cards.**
- Applied **typography, layout design, color theory, and visual hierarchy** for pixel-perfect execution.
- Translated brand identities into high-impact visual assets that drive audience engagement.

xWave (2025-2026)

“A mobile Application Design”

Designed a learning mobile application in Figma using active recall tools and streamlined architecture to overcome students' exam preparation barriers. This structured, user-centered experience successfully minimized cognitive load while boosting engagement, retention, and learner confidence.

“Website Rewamp”

Redesigned a minimalist Zong website in Figma using high-contrast design and streamlined architecture to eliminate legacy clutter. This structure boosted navigation speed and transaction rates for Gen-Z users by replacing choice paralysis with a fast, intuitive experience.

“SaaS Dashboard Design”

Designed PartTime-Pro, a desktop-first SaaS FinTech dashboard that helps freelancers track and verify billable hours with automated audit reports. Streamlined the interface in Figma to eliminate payment friction and turn daily work into clear financial proof.
