MARYAM FATIMA

TELECOMMUNICATIONS ENGINEER

+92-311-2242376 | maryamfatima0999@gmail.com | Karachi, Pakistan

PROFESSIONAL SUMMARY

Telecommunications Engineer from NED University with hands-on exposure to data center operations, IoT-based embedded systems, and communication systems design. Combines CCNA-level networking knowledge with strong documentation skills and a creative/design background. Seeking an entry-level role in telecommunications, networking, or embedded systems.

CORE COMPETENCIES

Networking & Telecommunications

- OSI/TCP-IP models, IPv4/IPv6 subnetting, and VLSM
- Hands-on routing & switching: Configuring static routing, OSPFv2, VLANs, Inter-VLAN routing, and EtherChannel
- Network Security & Services: Implementing Access Control Lists (ACLs), NAT/PAT, DHCP, and Port Security basics
- Infrastructure & Tools: Exposure to Rated-3 data center architectures, structured cabling, network monitoring tools, and NOC operations (TIA-942 standard)

Embedded Systems & IoT

- Oversight of an IoT-based sensor system integrating pH, temperature, and fat-content sensing (FYP)
- Hands-on experience with Arduino-based embedded systems and microcontroller-driven automation

Documentation & Software Tools

- Proficient in MS Office Suite, LaTeX (Overleaf) for technical reporting, Adobe Photoshop, Illustrator, and Canva
- Key Soft Skills: Technical project management, cross-functional team collaboration, analytical troubleshooting, and client relations

KEY PROJECTS

Smart Automated Milking Parlour using IoT Technologies — Final Year Design Project

- Worked with a cross-functional team of 4 members, spearheading technical project management and documentation for a low-cost IoT automation system
- Contributed to system architecture design and verification testing for an Arduino and ESP8266 WiFi module setup
- Coordinated team milestones, compiled final engineering reports, and successfully prepared the system for committee evaluation

Navigation System Visualization — 3D Modeling Project

- Developed an interactive 3D visual model of an aviation/marine navigation system using Blender to conceptualize real-time spatial data tracking
- Designed accurate assets and user-interface simulations to represent telemetry, signal propagation, and high-fidelity positioning metrics
- Utilized advanced rendering and camera positioning to deliver optimized, clear technical layouts displaying smooth 60 FPS visual outputs

EXPERIENCE & TECHNICAL EXPOSURE

Telecommunication Intern *Jun 2025 – Aug 2025*

PTCL Commercial Data Center, Karachi

- Gained hands-on exposure to operations of a Rated-3 certified commercial data center, focusing on network infrastructure
- Utilized network monitoring tools to track traffic flows, studied the TIA-942 infrastructure standard, and prepared technical documentation using LaTeX

Digital Artist *Apr 2025 – May 2025*

Insurgos Studios, Karachi

- Produced 2D art and visual design assets for client-based productions

Virtual Assistant (Freelance) *Oct 2025 – Present*

Remote

- Managed scheduling, client communication, and coordination tasks remotely

EDUCATION

Bachelor of Science in Telecommunications Engineering

NED University of Engineering and Technology, Karachi

Expected Graduation: 2026 | GPA: 3.05

CERTIFICATIONS

- CCNA (Cisco Certified Network Associate)
- Build With AI — Google Developer Groups on Campus, NEDUET (May 2023)
- Cisco Fundamentals of Cyber Security (July 2026)

LEADERSHIP & CREATIVE EXPERIENCE

Lead Graphic Designer — Formula Electric NED & Lit. and Publication Society, NED

- Partnered with student committees to drive media presence and event branding across campus

Community Volunteer — Ramadan Iftar Drive & Orphanage Outreach Programs

- Coordinated logistics, resource distribution, and community engagement for local social welfare drives

Freelance Illustrator

- Managed independent client consultations, timeline negotiations, and asset delivery
