SUMMARY

Results-driven GIS Engineer and Geospatial Analyst with a Bachelor's degree in Space Science and professional experience in GIS, Remote Sensing, Python programming, SQL, software development, and weather forecasting. Experienced in geospatial data processing, spatial analysis, satellite imagery interpretation, GIS automation, database management, and data visualization. Proficient in ArcGIS Pro, ArcMap, QGIS, Python, SQL, Power BI, and Microsoft Excel for developing scalable geospatial solutions. Skilled in weather and climate data analysis, electricity load forecasting, time-series modeling, and utility network analytics. Passionate about applying geospatial technologies, artificial intelligence, and data analytics to solve real-world environmental, infrastructure, and sustainability challenges.

EDUCATION

University of the Punjab Oct 2019 - Aug 2023
Bachelor of Science (BS) in Space Science, CGPA: 3.33/4.00

EXPERIENCE

GIS Engineer January 2024 – April 2024
Spatial Stack *Pakistan*

- Performed GIS mapping, spatial analysis, and geospatial database management for infrastructure and development projects.
- Processed, validated, and maintained large geospatial datasets using ArcGIS Pro, QGIS, Python, and SQL.
- Automated GIS workflows to improve efficiency and data accuracy.
- Created interactive maps, dashboards, and reports using ArcGIS, Power BI, and Microsoft Excel.
- Collaborated with multidisciplinary teams to support planning and data-driven decision-making.

Junior Software Engineer April 2024 – February 2026
Aerosynergy Solutions *Malaysia*

- Developed, tested, and maintained software applications using Python and SQL within Agile development environments.
- Optimized database performance and implemented efficient data-processing solutions.
- Performed software testing, debugging, troubleshooting, and application maintenance.
- Supported GIS applications through geospatial data integration and workflow automation.
- Assisted in machine learning prototypes, software enhancement, and technical documentation.
- Worked closely with cross-functional teams to deliver reliable and scalable software solutions.

GIS Engineer (Part-Time) March 2025 – August 2025
R Space *Pakistan*

- Delivered part-time GIS and remote sensing solutions for mapping and geospatial analysis projects.
- Processed and analyzed spatial datasets using ArcGIS Pro, QGIS, Python, and SQL.

- Developed thematic maps, GIS databases, and spatial visualizations.
- Automated geospatial workflows and improved data processing efficiency.
- Performed spatial analysis, quality assurance, and technical reporting for project delivery.
- Collaborated remotely with project teams to provide timely geospatial solutions.

GIS Intern July 2022 – September 2022

Urban Unit *Pakistan*

Internship

- Assisted in GIS mapping, spatial analysis, and geospatial database management.
- Processed and validated spatial datasets using ArcGIS and QGIS.
- Supported map production, data collection, and project documentation.
- Assisted senior GIS professionals in urban planning and infrastructure development projects.

Weather Forecasting Intern Jun 2022–July 2022

Pakistan Meteorological Department (PMD) *Pakistan*

Internship

- Assisted in weather forecasting and meteorological data analysis.
- Worked with satellite imagery, radar observations, and weather datasets.
- Analyzed atmospheric conditions and climate data for forecasting applications.
- Gained practical experience in meteorological monitoring and environmental analysis.

PROJECTS

Electricity Load Forecasting Using Weather Data

- Built forecasting models using Python and statistical techniques.
- Analyzed electricity demand using weather variables including temperature, humidity, rainfall, and seasonal trends.
- Applied time-series analysis to improve forecasting accuracy.
- Developed Power BI dashboards for demand forecasting and visualization.

GIS-Based Utility Network Analysis

- Created and managed utility infrastructure datasets.
- Conducted network analysis and spatial modeling using ArcGIS.
- Produced analytical maps and reports for planning and maintenance.

Remote Sensing & Spatial Analysis

- Processed and analyzed satellite imagery for land-use and environmental monitoring.
- Applied GIS and remote sensing techniques to produce spatial insights and thematic maps.
- Supported infrastructure planning and environmental assessment projects.

TECHNICAL SKILLS

Geographic Information Systems (GIS)
Remote Sensing
Geospatial Analysis
Spatial Modeling
Satellite Image Processing
GIS Automation

Weather Forecasting
Meteorological Data Analysis
Climate Data Analysis
Python Programming
SQL Database Management
ArcGIS Pro
ArcMap
QGIS
Power BI
Data Visualization
Dashboard Development
Time-Series Analysis
Machine Learning
Utility Network Analysis
Electricity Load Forecasting

CERTIFICATIONS

Python for Data Analysis
ArcGIS Training
Weather Forecasting (Pakistan Meteorological Department)
Microsoft Azure AI Fundamentals
Artificial Intelligence Certification Virtual
Assistance Certification

TECHNICAL SKILLS

GIS & Remote Sensing: ArcGIS Pro, ArcMap, QGIS, Remote Sensing, Spatial Analysis, Geospatial Mapping, Spatial Modeling Programming: Python (Pandas, NumPy, Matplotlib), SQL Data Analytics: Power BI, Microsoft Excel, Dashboard Development, Statistical Analysis, Forecast Modeling, Data Visualization Weather & Climate: Weather Forecasting, Meteorological Data Analysis, Climate Data Analysis, Time-Series Analysis, Electricity Load Forecasting

SOFT SKILLS

Analytical Thinking; Problem Solving; Communication; Team Collaboration; Critical Thinking; Time Management; Adaptability; Attention to Detail

ATS KEYWORDS

GIS Engineer, Geospatial Analyst, Remote Sensing, Earth Observation, Satellite Imagery, ArcGIS Pro, ArcMap, QGIS, Python, SQL, Power BI, Weather Forecasting, Meteorological Data Analysis, Climate Analytics, Spatial Analysis, GIS Automation, Machine Learning, Utility Analytics, Environmental Monitoring, Data Visualization, Dashboard Development, Predictive Analytics, Geospatial Intelligence.
