SUMMARY

Creative Game UI Designer and Senior Postproduction Artist with 3 years plus of professional experience in the game development industry. Skilled in designing and engaging game UI/UX, 2D game assets, gameplay HUDs, buttons, icons, panels, menu, and marketing screens for mobile games. Experienced in Adobe photoshop, Adobe Illustrator, Figma, and Unity, with strong expertise in image editing, compositing, visual enhancement and postproduction. Passionate about creating clean attractive and production-ready game visuals that improve both player/user experience and overall game presentation.

EXPERIENCE

Game UI Designer & Senior Postproduction Artist Mar 2023 - Present
Game Pixel Studio *Lahore*

- Designed and developed visually appealing Game UI/UX for mobile games, including Main Menus, Gameplay HUDs, Store, Settings, Level Selection, Character/Skin Selection, Upgrade and other interface screens.
- Created and edited 2D game assets such as buttons, icons, panels, badges, headers and UI elements according to different game themes.
- Produced high-quality game screenshots and marketing creatives for Google Play Store and App Store.
- Performed post-production and image compositing to enhance game visuals, including lighting, color correction, environment enhancement, character/object placement and overall presentation.
- Designed UI systems with consistent colors, typography, textures, shapes and visual styles across different game projects.
- Prepared and optimized UI assets for Unity game development, ensuring proper sizes, transparency and export formats.
- Used Adobe Photoshop, Adobe Illustrator and Figma for game UI design, asset creation, editing and export.
- Worked on UI and visual assets for multiple genres including Superhero, Simulator, Racing, Restaurant, Action, Transformation and Hyper-Casual games.
- Created promotional visuals and polished screenshots with a focus on high-quality, engaging and market-ready presentation.
- Collaborated with game development requirements to deliver developer-friendly, organized and production-ready UI assets.
