PROJECTS

Online Car Rental System (CaRS – AI-Powered)

(React.js, TypeScript, Google Gemini AI, Vite, Vercel)

- Built a serverless car rental platform with intelligent recommendations and booking support.
- Integrated Google Gemini AI for dynamic pricing assistance and automated document generation.

TaskSwift AI (Voice & AI Powered)

(React.js, CSS, Voice Recognition API)

- Developed a smart task management application with voice command interface.
- Implemented AI-powered analytics, task filtering, and intelligent suggestions.

Google Form Automation Workflow (Zapier, Google Forms, Sheets, Drive, Gemini API)

- Built intelligent form-to-sheet automation with AI-enhanced data routing.
- Integrated email notifications and automated Drive organization.

Easy Trade Zone (ETZ) – Final Year Project

(PHP, Python, MySQL, HTML/CSS, JavaScript, Bootstrap)

- Developed a full-stack e-commerce platform with product inspection, seller rating, and real-time chat features.
- Built secure backend functionality with database integration.

Task Management System (ASP.NET Core, React.js, SQL Server)

- Built a full-stack task management system with authentication and role-based access.
- Implemented CRUD operations, logging, and testing features for reliability.
