Edward Jung

AI-Native UI/UX Designer

South Korea · Open to Remote edwardeddiejung@gmail.com eddieeddie.com linkedin.com/in/edwardeddiejung

PROFILE

Entry-level UI/UX designer focused on human-led problem solving and AI-assisted exploration. I use Figma, interactive prototypes, and frontend-aware workflows to turn product ideas into clear, responsive interfaces. Seeking a first professional design role where I can contribute thoughtful UI, learn from real users and teammates, and help ship usable digital products.

SELECTED PROJECTS

AutoCRM · Action-First Dealer CRM Redesign

Self-directed UI/UX exploration

- Reframed a dealer CRM around prioritized actions, clearer information hierarchy, and efficient task flows.
- Created responsive interface concepts and prototypes while treating the work honestly as an unvalidated design exploration.

Petlover · Pet-Sitting Marketplace Redesign

Self-directed UI/UX project

- Explored how trust, service clarity, and stronger decision cues can improve a pet-sitting marketplace experience.
- Developed user flows, interface hierarchy, and polished web screens in Figma.

Subly · Subscription Tracker & Apple System UI Study

Self-directed product design study

- Designed a subscription-management concept focused on scanning, categorization, and recurring-payment visibility.
- Studied Apple interface conventions, reusable components, and interaction patterns.
